Proudly New Zealand-owned and family-operated, Tredsafe has been crafting safety solutions for the flooring industry since 1982, spanning three generations.

After years of experience in the industry, we recognised that existing safety materials didn't meet the durability demands we required. Extensive research led us to develop our own unique product, Diamondtred, right here in New Zealand. We perfected a formula that delivers the reliability, functionality, and design excellence we stand for. While it's been embraced by Kiwis for decades, our reputation has grown internationally across four continents and twelve countries.

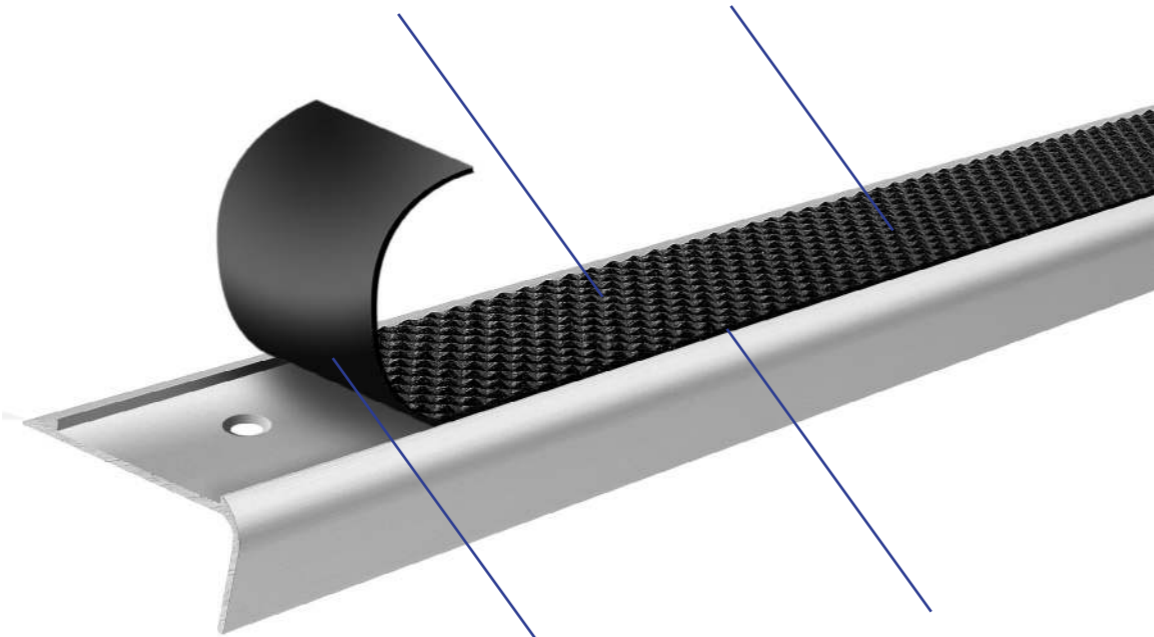

# The Diamondtred Difference

## Diamonds in the rough

Our unique stair nosing inserts stands out worldwide, featuring sustainably sourced sand from New Zealand’s Taporā region. Combined with a raised diamond shape, this innovation delivers exceptional 360-degree slip resistance. Built to last, it’s engineered to endure heavy use with minimal wear and tear, providing long-term safety and durability you won’t find anywhere else.

Available in 20 stocked colours, with colour and brand customisation available

Diamond-shape provides 360-degree slip resistance

Self-adhesive backing for ease of installation

Available in multiple widths to suit every Tredsafe profile

Visit [page 50](#) for more information

## Ordering tips

Stair Nosings	<p>The maximum length is 3.66m (or 2.5m for contoured variants and friction bars). Cut to length services are available. When specifying or ordering you need to advise:</p> <ul style="list-style-type: none"><li>• The product code</li><li>• The finish or colour</li><li>• Length required (to the nearest two decimal places)</li><li>• Quantity required per length</li></ul>
Inserts	<p>The maximum lengths of our inserts are 25m. When specifying or ordering you need to advise:</p> <ul style="list-style-type: none"><li>• Colour (stocked or custom)</li><li>• Length required</li></ul> <p>Optional</p> <ul style="list-style-type: none"><li>• If multiple inserts required, advise if you want to mix and match colours</li></ul>
Aluminium Transitions and Edging	<p>Supplied in 2.5m lengths. When specifying or ordering you need to advise:</p> <ul style="list-style-type: none"><li>• Product code</li><li>• Finish</li><li>• Number of lengths required</li></ul>
PVC Edging	<p>Supplied in 20m or 25m coils (see product details). When specifying or ordering you need to advise:</p> <ul style="list-style-type: none"><li>• Product code</li><li>• Colour</li><li>• Number of coils required</li></ul>
Matting	<p>CONNEX is sold per 1sqm/box. When specifying or ordering you need to advise:</p> <ul style="list-style-type: none"><li>• Number of boxes required</li><li>• Add DT080 if an entrance matt ramp or framing is required</li></ul>
Tactiles	<p>Available in 900, 1200 or 1500 x 600mm with compliant dome spacings and anti-slip qualities. Sold by the sheet, but can be customised by cutting down to suit compliance and site requirements</p>

# Stair Nosing

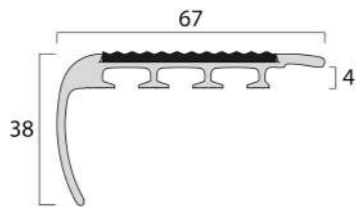

Tredsafe’s stair nosing serves both safety and aesthetic purposes. They protect the edges of the stairs from wear and tear, while adding anti-slip and visual definition to each step to reduce the risk of accidents. Designed to suit all applications and environments, our anti-slip stair nosing treads provide superior traction and visibility.

Key features	<ul style="list-style-type: none"><li>• Available in different materials including anodised aluminium, or rigid PVC</li><li>• Best-sellers are available in different anodised colours</li><li>• Nosing inserts come in a variety of 20 stocked colours</li><li>• Standard 3.66m lengths<ul style="list-style-type: none"><li>- Supplied pre-drilled for screw fixing and easy installation</li><li>- Cut to length service available so you can install quicker</li></ul></li></ul>
Applicable floor covering	<ul style="list-style-type: none"><li>• Carpeted</li><li>• Uncovered</li><li>• Timber</li><li>• Ceramic tile</li><li>• Vinyl</li></ul>

# Transitions

Tredsafe flooring transitions offer an ideal solution for seamlessly connecting different surfaces, such as LVT, carpet, and vinyl, to bare floors or other surfaces with height variations. These transitions serve as an appealing protective barrier, preventing flooring edges from damage, whilst creating a safe and level transition, reducing the risk of tripping hazards. All are supplied in 2.5m lengths

---

## Key features

- Some available in different anodised finishes including black, brass, and bronze
- Standard 2.5m lengths, supplied pre-drilled for screw fixing and easy installation
- Most transitions are available in a contoured version to fit the curves of your flooring requirements

---

## Applicable floor coverings

- Carpet
- Bare/uncovered
- Ceramic tile
- Vinyl
- LVT
- Rubber

Innovative  
& creative  
flooring safety  
solutions that  
meet industry  
requirements

# Edging

Complete the look of any space with the right edging solutions. Floor edging is essential for finishing transitions where flooring meets walls, skirting, or exposed edges, preventing gaps and creating a seamless finish. Whether filling the space between flooring and skirting or extending flooring up the wall, the right edging ensures durability, visual appeal, and a polished result.

---

## Floating floor Edging

Floating a wood, laminate or LVT flooring requires an expansion joint to accommodate natural expansion and contraction caused by temperature and humidity changes. Edging trim covers and protects the exposed edges while maintaining the floor's stability and appearance. Tredsafe has a wide range of trims suitable for all applications. Suitable for a variety of flooring thicknesses from 4mm. Suitable for interior and exterior use.

---

## Floor / Wall Trims

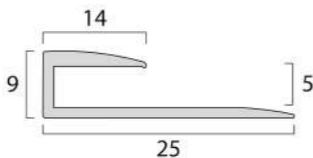

In many applications, vinyl flooring extends from the floor part-way up the wall. To achieve a clean finish, a trim is needed to cap the vinyl edge and transition to the wall. Our floor-to-wall transitions create a tidy connection that prevents dirt and bacteria buildup, making cleaning and maintenance simpler.

# Tactiles

**Tactile Ground Surface Indicators, or TGSIs,** are internationally-recognised warnings that indicate the presence of pedestrian hazards, such as stairs or slopes, particularly aiding those with visual impairments.

**Tredsafe's Alltac Sirius Plates** provide a smarter, more durable solution for tactile requirements. These robust plates are designed for longevity, ensuring hardwearing performance in high-traffic areas. With fewer holes to drill and less adhesive required, installation is faster and more efficient, minimising disruption. Unlike single-stud TGSI systems, Alltac Sirius Plates cover damaged areas seamlessly, reducing the need for time-consuming substrate repairs and helping maintain compliance over time.

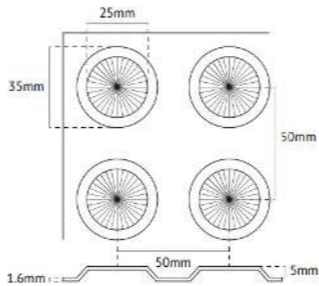

**Main Application Field**

- Anywhere that presents pedestrian hazards such as stairs or slopes
- Suitable for interior and exterior use

**Product Feature & Benefits**

- Easy and fast installation
- 360 degrees slip resistance
- Higher LRV values\* compared to traditional TGSIs
- Low profile for improved safety
- Marine-grade aluminium construction
- Available in mill finish, platinum, griptex black and griptex yellow

**Alltac Sirius Plate**

- Available in multiple plate sizes  
900x600mm  
1200x600mm  
1500x600mm
- Double-sided tape pre-applied for easy installation
- Can be cut to size requirements

# Matting

Protect your building entrance with the trusted CONNEXX entrance matting system. CONNEXX offers a clean, flexible, and effective solution for every entrance area to absorb moisture and brush away dirt.

Main Application Field	<ul style="list-style-type: none"><li>Insert into an existing mat well for a seamless look</li><li>Install on top of existing flooring along with Tredsafe's proprietary finishing trim without the need to create a mat well, ensuring you are meeting building code requirements</li></ul>
Product Features & Benefits	<ul style="list-style-type: none"><li>High moisture absorbance ensuring water doesn't get into your building with 100% PA6.6</li><li>Coarse dirt is caught in the gaps while the inserts absorb moisture and residual dirt – keeping your building cleaner for longer</li><li>Easy maintenance as dirt can be easily vacuumed without having to remove the entrance matting</li><li>Module system means that it is easy to install and replaced</li><li>UV Resistant PVC making sure your mat will not fade overtime UV Resistant PVC – 100% soft PVC</li></ul>

DT080 Ramp	<p>If your space doesn't have a mat well in place, Tredsafe's DT080 ramp finishing trim is the perfect solution.</p> <ul style="list-style-type: none"><li>Powder-coated aluminium in black</li><li>Space for 37mm Diamondtred insert</li><li>Excellent slip-resistance when wet</li><li>Suitable for interior and exterior use</li><li>Transition for 15mm height variations</li><li>Ideal for high traffic flow areas</li></ul>

# Diamondtred Insert

Tredsafe inserts have a unique raised pyramid texture which provides exceptional multi-directional slip resistance. All Tredsafe inserts come with a self-adhesive peel and stick backing tape for ease of installation and concealment of fixing screws for a neat and tidy job.

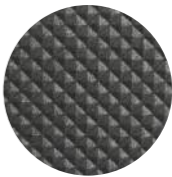

The adhesive is strong and ready to withstand temperature fluctuations from below -40°C to 140°C. It will not peel, warp, or shrink - ensuring your stairs remain safe even in cold or hot conditions. The colour range provides extreme visibility to highlight the edge of a step or landing. All inserts (except Chevron) are available in 13mm, 37mm, 43mm or 53mm widths.

## Subtle Colours

125 Safety Pink

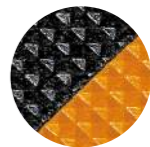

126 Tredsafe Blue

127 Safety Khaki

Chevron is supplied in 1.2 metre lengths in 37mm and 43mm widths only  
Developed to give maximum visibility for step edges  
Used extensively in the transport industry and in hazardous areas

115 Chevron

Can't find the colour you want? We can create our inserts in any colour. Visit p.56 for more info.

# Bespoke Inlays

Our bespoke inlays offer a clean, integrated look, ideal for wooden staircases and other architectural applications. Designed for both new builds and retrofitting, these inserts provide a simple way to enhance the appearance of stairs while ensuring long-lasting durability. The ability to retrofit means existing staircases can be updated without major renovations, making them a practical choice for projects requiring both form and function. Perfect for spaces where design and safety need to work together.

The best safety  
solutions for  
your business

# Low-Light Products

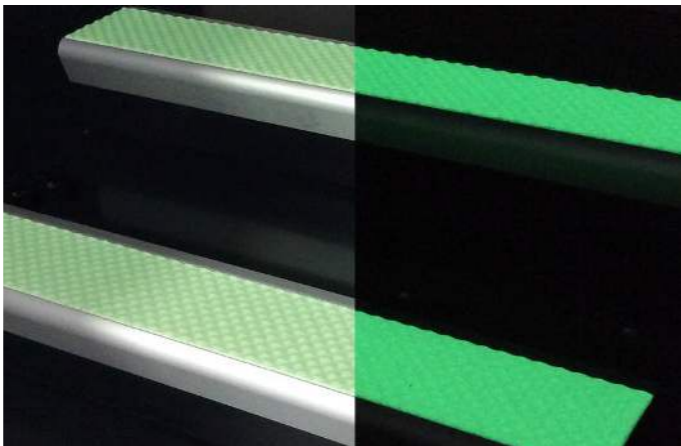

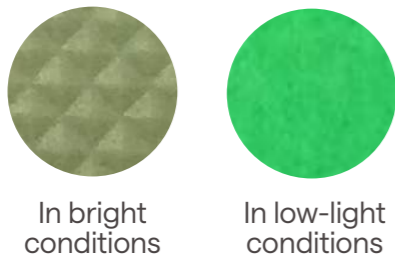

Your stairs should stay safe, no matter the lighting. Tredsafe provides a variety of products to ensure stair safety, including LED nosing profiles and glow-in-the-dark inserts, giving you reliable visibility and safety around the clock.

## LUMITRED

The Lumitred range provides the ultimate solution in reduced light conditions. Utilising phosphorescent pigments, the inserts are charged by natural or artificial light and activate instantly in failing light conditions. Lumitred inserts are available in 13mm, 37mm, 43mm or 53mm widths.

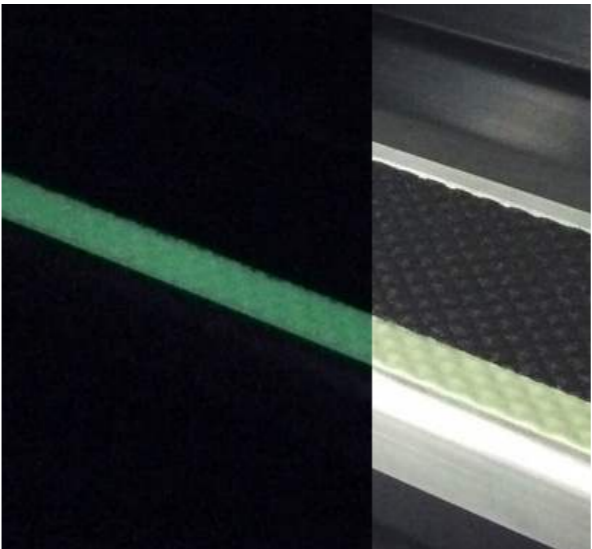

- Applications
- Emergency exits for commercial or multi-residential buildings
  - Guidance / way finding
  - Supporting the visually impaired
  - Theatres
  - Stadia

- Features
- Lumitred is an environmentally better choice as it is completely free of PVC - reducing environmental impact.
  - The glow pigment is co-extruded into the product giving it increased lifespan and all round glow performance - tested in accordance with Section 34, UL1994 “Standard for Safety” Luminous Egress Path marking Systems and sections of ASTM E2073-02. Visual acuity test conducted up to 300 minutes which is over 3 times the test requirement.

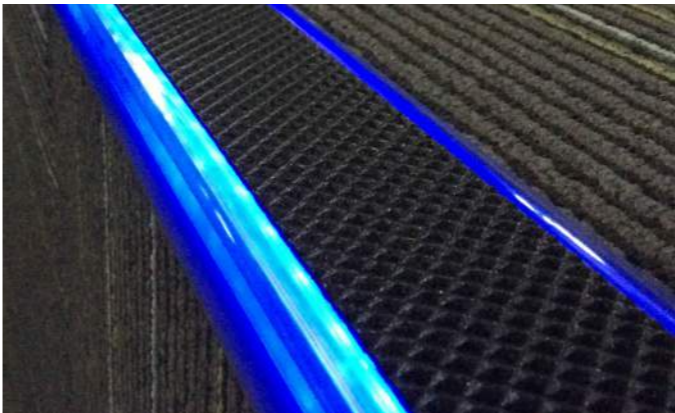

## ZEBRON

Zebron combines the extensive Diamondtred insert colour range with a Lumitred insert to provide a total stair nosing solution. Zebron is a 13mm wide strip of Lumitred, coupled with any colour to fit 37mm, 43mm or 53mm wide inserts. Lumitred may also be used as a Zebron strip in a 13mm wide insert.

## EL165 - LED PROFILE

Illuminate your staircase with style using the EL165 LED-capable stair nosing. Designed to seamlessly integrate an LED strip, this profile enhances both safety and aesthetics. Choose from a range of light colours, and customize your lighting with optional remote or wall-mounted colour control for the perfect ambiance.

Visit [page 17](#) for more information

# Customisation

If you can dream it, Tredsafe can make it! Our customisation services cover everything from insert colours to profile shapes, allowing you to achieve the exact look you want to complement your designs perfectly.

## Colour Customisation

Looking for a specific colour for your inserts? Tredsafe offers Pantone colour matching to ensure your design vision comes to life. Whether you're after a bold statement or a subtle complement to your space, we'll take care of the details. Please note that a minimum order quantity applies for custom colours.

Spectrum Center is an indoor arena located in Charlotte, North Carolina, United States. Operated by its main tenant, the NBA's Charlotte Hornets, the arena seats up to 20,000 people. Tredsafe was able to undertake this stair nosing refurbishment project which included custom coloured inserts for the stadium. A total of 3.4km of custom coloured teal and purple insert (Hornet's team colours), were installed on the stairways of the arena. This was nominated for the 'Best Branded Environments' - for the Spark Awards, part of Fuse Alliance.

## Brand Customisation

Elevate your stair customisation even further with branded or custom messaging on your inserts—an exclusive service from Tredsafe. This unique option offers a cost-effective way to showcase your brand, even on the stairs.

Way-finding, seat and aisle numbers, or brand sponsorship is available to be added on request. Digital mockups are available within 48 hours, and physical samples are available within 7-14 days upon request to help bring your vision to life.

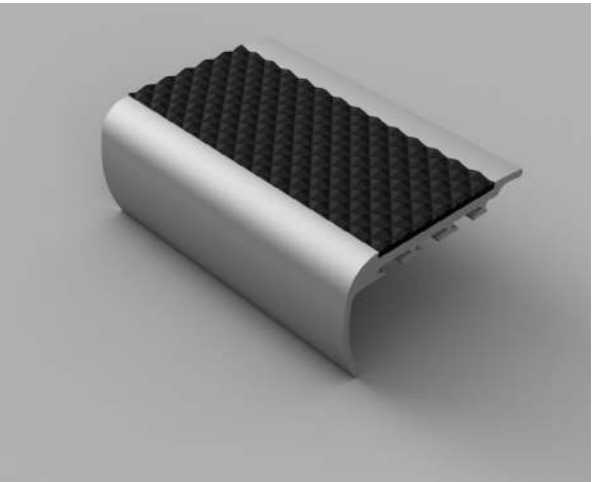

Example of digital concepts with Row and Seat markings

Example of custom sample concept for the Charlotte Hornets

## Profile Customisation

For special project requirements, Tredsafe can design and manufacture custom profiles. This service includes concept design and 3D printed samples. Lead times for samples are approximately 2-3 weeks. Enquire for pricing.

Example of custom 3D render of stair nosing concept

# Contoured Profiles

Tredsafe understands that sometimes there are some tricky jobs and have therefore re-engineered several of the most popular stair nosings and transitions to allow contoured installation on-site.

## Contoured Nosings

These stair nosings are available in 2.5m lengths and are priced in a complete set (excluding insert). They are a two-part system which is both economical and easy to install. Works with regular colour insets – Lumitred, Zebtron and Chevron are not available for contoured profiles. To ensure the profiles are not over extended, which may cause product failure or defects, the minimum radius for each profile are as per the table below.

Product Code	Min Radius	Insert Size	Designed For	Length	Material	Page
AA123CN	500mm	53mm	Carpet Tiles	2.5m	Aluminium	14
AA124CN	500mm	53mm	Carpet Tiles	2.5m	Aluminium	15
AA134CN	550mm	63mm	Carpet Tiles	2.5m	Aluminium	15
AA110CN	500mm	53mm	Vinyl	2.5m	Aluminium	21
AA130CN	500mm	63mm	Vinyl	2.5m	Aluminium	23
AA125CN	450mm	53mm	Uncovered	2.5m	Aluminium	19
AA128CN	450mm	53mm	Uncovered	2.5m	Aluminium	18
AA138CN	450mm	63mm	Uncovered	2.5m	Aluminium	19

Example of contoured nosing - available in a two-part system for easy installation

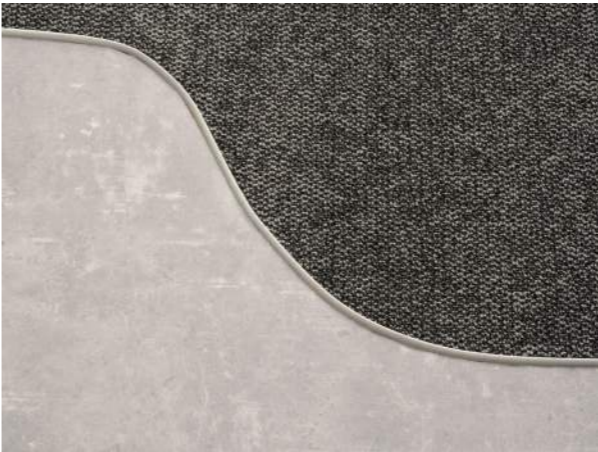

## Contoured Transitions

Most of Tredsafe's transitions are available as a contoured variant. These have pre-cuts made to allow for curving in either direction.

Transitions that are available as a contoured variant

Contoured Transition Product Code	Contoured variant of	Page

DT066	DT064	33
DT067	DT065	33
DT048	DT047	33

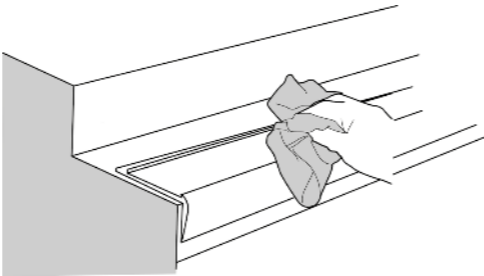

Example of contoured transition with pre-cuts for easy installation

# Insert Installation

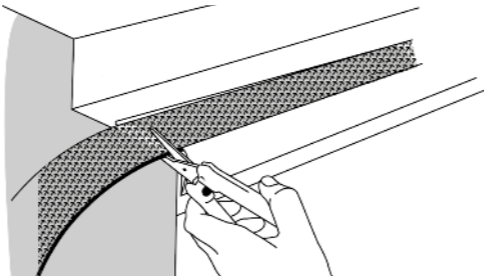

Step 1

Ensure the aluminium channel is clean from dust, residues and debris. Wipe down with a cleaning solvent (Denatured or Isopropyl Alcohol or similar.)

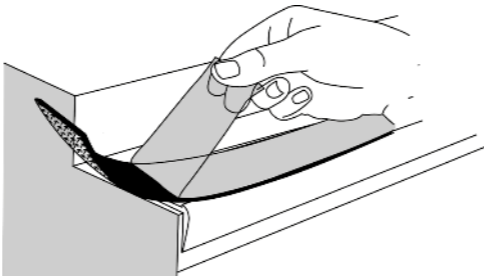

Step 2

Pre cut the insert to your required length.

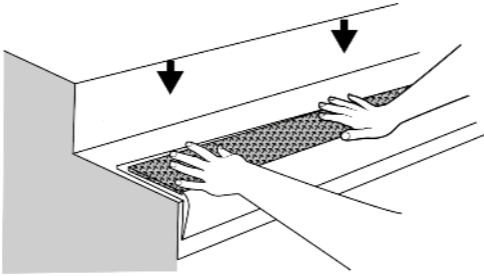

Step 3

Remove the adhesive backing liner from the Tredsafes insert.

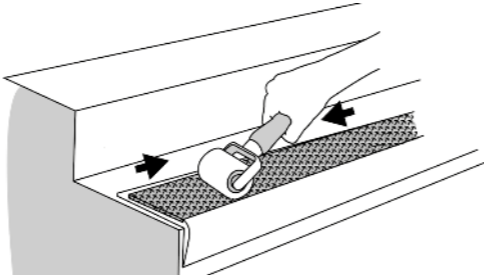

Step 4

Install by placing the insert into the nosing and pressing into place without undue stretching.

Step 5

Once in place, roll over the insert to ensure consistent adhesion and a secure bond.

# Technical Data Sheet Insert

Tredsafes insert is manufactured from a special blend of PVC, sustainably sourced industrial sand and polymeric plasticiser giving a homogenous hard wearing flooring for wet and dry conditions (Meets British Standard for Sheet Vinyl and Vinyl Tiles BS3261:1973).

Special Properties	Tredsafes insert is resistant to attack from ultraviolet light, oil, grease, petrol, salt, dilute acids and alkalis, common household chemicals and detergents. Organic solvents will soften Tredsafes insert.

# Technical Data Sheet

# Nosing

## Aluminium Component

Under normal conditions the extruded aluminium sections are extremely durable, but the following should be taken into account when specifying:

- Aluminium is attacked by alkali in some mortars and plasters in wet conditions
- Electrolytic corrosion is likely when in contact with some metals, particularly copper, copper alloys, iron and steel
- Although it is not affected by most timbers, corrosion is very likely when in contact with wet timber, such as western red cedar, Douglas fir and oak.

## PVC component

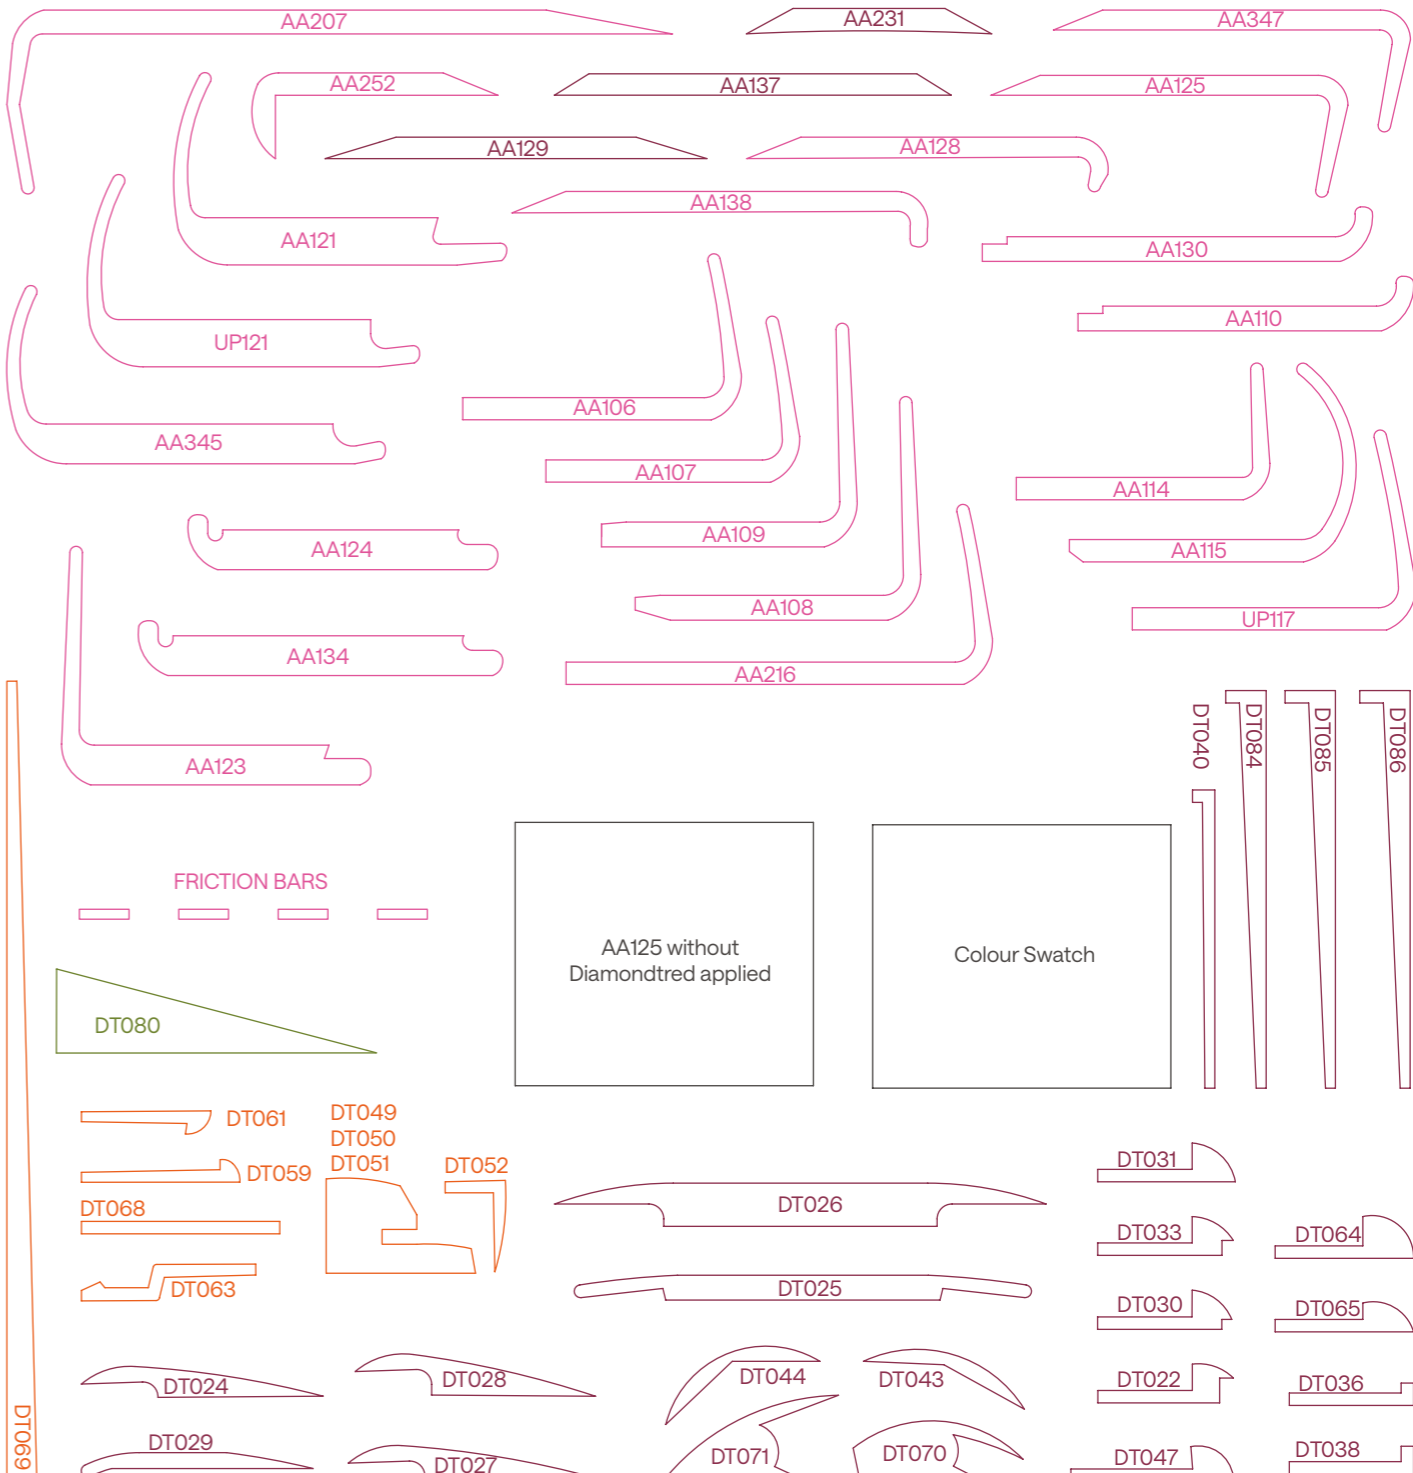

Extremely durable and unaffected by most chemicals in common use. The UP series of stair finishes are unaffected by insects and will not support the growth of fungi, moulds, or bacteria, resistant to normal thermal loading and ultraviolet, however they are not recommended for use outdoors.

If you require any other technical information on the products listed in this catalogue, visit our website [tredsafe.com/documents](https://www.tredsafe.com/documents)

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.
