

EL165

Carpet Stair Nosing

Image/ Drawing

Description

The most compact aesthetic illuminated nosing available. Used extensively in University lecture theatres, restaurants, cinemas and clubs. Surface mounted LEDs available in a variety of colors.

Purpose

We have manufactured this stair nosing product with a built in packer to simplify installation with direct stick carpets. It can also be used in a recessed step or with a packer for higher floor coverings. LED lights illuminate the step edge in dark areas or liven up an ordinary installation.

Material

- Rigid clear PVC. Suitable for interior use only.
- Standard 12' Lengths
- Supplied pre drilled for countersunk screw fixing (screws supplied)

Insert

1 x 43mm Tredsafe Diamondtred Insert

Yellow

Warm White 3000K

Natural White 4000K

Cool White 63000K

Multi-Colour RGB

Installation

The nosings are supplied with the LEDs pre-installed with 200mm wiring at one end. The nosing should be screwed to the step surface (5 screws per metre) once carpet has been installed and when an electrician is present to wire to the power supply. An additional packer can be used for alternative flooring materials. Once the profile is installed, ensure the insert channel is clean from dust, residues and debris. Pre-cut the insert to your required length. Remove the adhesive backing liner. Place the insert into the nosing and press into place without undue stretching. One in place, roll over the insert to ensure consistent adhesion and a secure bond.
